SMITH HATCHERY

TISDALE, Sask.
Phone 130-5

PRINCE ALBERT
15th Street & 2nd Ave. W.

Dear Fellow Poultrymen:-

The hatching season is again close at hand and we take this opportunity to thank our many customers for their chick business in past years. We appreciate the confidence which our customers have placed in us and it is our sole aim to retain this good reputation.

In this catalogue we have tried to explain exactly what we have done to produce top quality chicks and why you should give our chicks a trial. We want you to read closely the details concerning our breeding flocks, our equipment, our method of doing business and our guarantees.

We have opened up a branch hatchery in Prince Albert in order to obtain more and better train connections for shipping chicks and thus be able to give our customers even better service. This branch at Prince Albert will be managed by Neil Smith who has been taking the night shift and supervising the operation of the incubators for the last six years at our plant at Tisdale.

If you are in Tisdale or Prince Albert at any time we will be glad to have you visit our hatchery and see how chicks are hatched by the thousands in our modern all-electric Petersime Incubators.

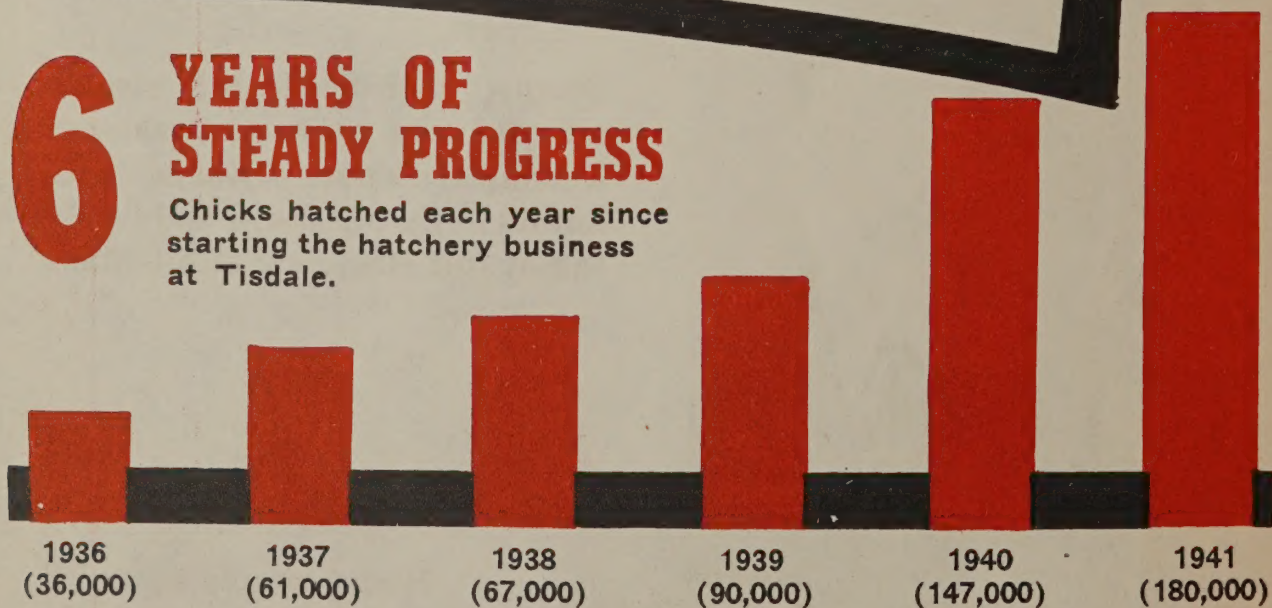

Wishing you a happy and Prosperous 1942.

Yours sincerely,

Andrew Smith.

6 YEARS OF STEADY PROGRESS

Chicks hatched each year since
starting the hatchery business
at Tisdale.

EVERY YEAR MORE AND MORE PEOPLE BUY SMITH CHICKS
THERE MUST BE A REASON

So great has been the demand for our chicks that we have opened a Branch Hatchery at Prince Albert. We have installed three more large all-electric Petersime Incubators so we will be able to fill all chick orders on the date required.

BUY SMITH CHICKS IN 1942 AND BE ANOTHER SATISFIED CUSTOMER
THE BEST WAY TO GET BUSINESS IS TO DESERVE IT

FOUR BROTHERS ... at your service

SMITH
HATCHERY

3

ANDREW SMITH, *General Manager.*

Completed three years agriculture and poultry course at Saskatchewan University in 1930. Has had 20 years experience in raising poultry. Eight years experience in general hatchery work. Fully acquainted with all phases of poultry production.

NEIL SMITH, *Prince Albert Manager.*

Has been night man and in charge of the operation of the incubators at our plant at Tisdale for the past six years.

HAROLD SMITH, *Incubator Expert.*

Studied mechanics and electricity for two years at Saskatoon Technical School. Keeps incubators in tip top shape and working at full efficiency at all times.

DONALD SMITH.

Helps complete our 24 hour service, taking full charge of the incubators during the night.

REASONS WHY YOU SHOULD BUY SMITH CHICKS

AS soon as your order is received it is promptly booked and recorded, a reply goes out to you immediately, informing you the exact day your chicks will arrive.

BEFORE each hatch is shipped the orders are carefully checked so that you are sure to receive your chicks on the day you are expecting them. They are carefully sorted and delivered to the train a few minutes before the time of its departure. In this way there is no danger of the chicks being chilled or overheated.

CONSEQUENTLY your chicks arrive in tip top shape all ready to start their career. Take good care of your chicks and you will raise a fine flock, for these chicks have breeding behind them.

DURING our six years at Tisdale we have been working to produce better quality chicks and have purchased the best of modern electric incubators, being the largest hatchery in Saskatchewan operating exclusively with Petersime electric machines. This incubator is known to most nearly resemble Mother Nature's way of hatching and famous for its gentle air movement which produces strong, healthy, vigorous chicks.

EVERY egg set is from Saskatchewan Approved and Pullorum Tested Flocks which have been carefully bred for high egg production and selected as being outstanding birds. Only eggs averaging 24 oz. or over to the dozen are set so as to produce large vigorous chicks.

FOLLOWING the careful selection of flocks we are very careful in checking the eggs which are set. The incubators are tended and checked every hour of the day and night in order to produce husky chicks, which are taken from the incubators and gradually hardened off. Before being shipped the chicks are counted and sorted very carefully, making sure they have well healed navels and are full of vigor and vitality, so we do not hesitate in guaranteeing 100% live arrival as well as complete satisfaction and service.

If you have any Poultry Problems, write us, and we will do all we can to help you. Let us help you to help yourself to more Profits from Poultry.

A FEW LETTERS from our Customers

SMITH
HATCHERY

5

Tisdale, Sask., Jan. 15, 1942.

The 165 New Hampshire pullets we bought last April have done very well and we raised 155 fine large pullets. They have laid 95 to 112 eggs every day all fall and winter. The eggs have been very good size, and we have had a very good market for them at Flin Flon, making a real nice profit.

We do not hesitate to recommend your chicks to any one wanting to build up a good flock.

We plan to get the same number of pullets again this year.

Sincerely,

—MRS. G. R. ANDERSON.

* * * * *

The Pas, Man., May 13th, 1941.

I am sorry I did not write you sooner to tell you how nice the chicks were which I received from you. They arrived in splendid condition, and are by far the best chicks I have ever had.

—MRS. A. B.

* * * * *

St. Brieux, Sask., May 10th, 1941.

I received the nice chickens all alive. I am very glad with them, they grow well. Thanks very much.

—MRS. A. D.

* * * * *

Melfort, Sask., June 10, 1941.

We have had very good success again with our chickens—only lost 5 out of 162.

—E. S.

* * * * *

Armit, Sask., May 18th, 1941.

Smith Hatchery:

Received my chicks on the 14th in perfect condition; a healthier and perkier lot of chicks I never saw. I couldn't ask for better; every one alive and on its feet. Thanks.

—C. S.

* * * * *

Davidson, Sask., June 28, 1941.

Received chicks O.K. all alive on arrival, and say, were they a lively bunch. Have lost a few but still have 202. I think I fed a little too much on the start. Will sure try some more next year as this is an experiment. My friends think they are a fine lot of chicks.

—W. E. H.

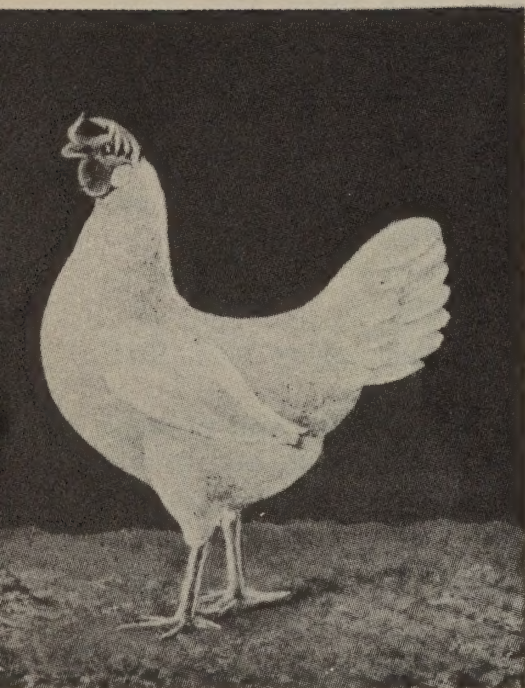

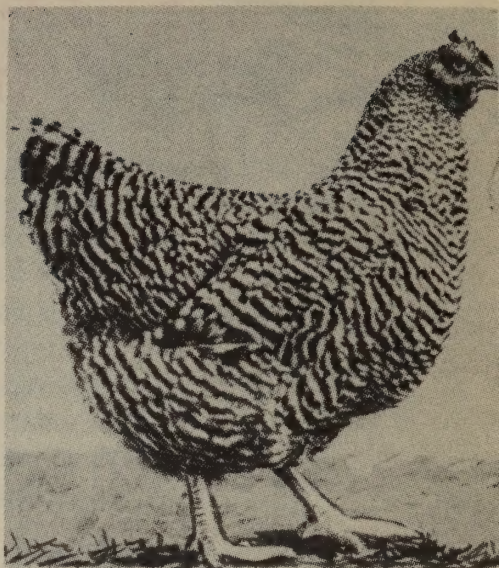

**GIVE THE CHILDREN
A HOBBY . . .**

BARRED ROCKS

Our Largest Selling Breed

The pullets are hard to beat as layers, and sell very well on the market when it comes time to dispose of them. The cockerels make very fine dressed birds. We have many fine flocks of Barred Rocks, many of them headed with Pedigreed and R.O.P. males. Barred Rocks are the old stand by for farm flocks and are still hard to beat.

WHITE LEGHORNS

The Egg Machine

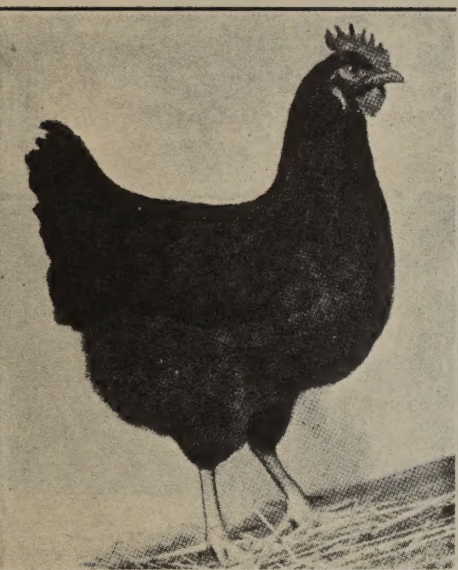

They feather quickly, develop early, and lay a large number of large uniform white eggs. We have some very outstanding flocks supplying us with hatching eggs. Through years of selection and the use of large outstanding male birds they have been able to increase the body size, so we feel certain you will be very well pleased with the real large vigorous pullets you will raise from these chicks. Many of these flocks are mated with Pedigreed and R.O.P. cockerels.

Brancepeth, Sask, June 20, 1941.

Must drop you this line and let you know how well pleased we are with our New Hampshire chickens we purchased from your hatchery May 20th. We raised the 104 all alive and now June 20 still all alive and the most ambitious flock we ever saw. They are well developed and well feathered for a month old. We used chick starter till now and turning them to growing mash. In short, we are very pleased with the flock. Best of luck to the Hatchery.

—J. N. M.

NEW HAMPSHIRE

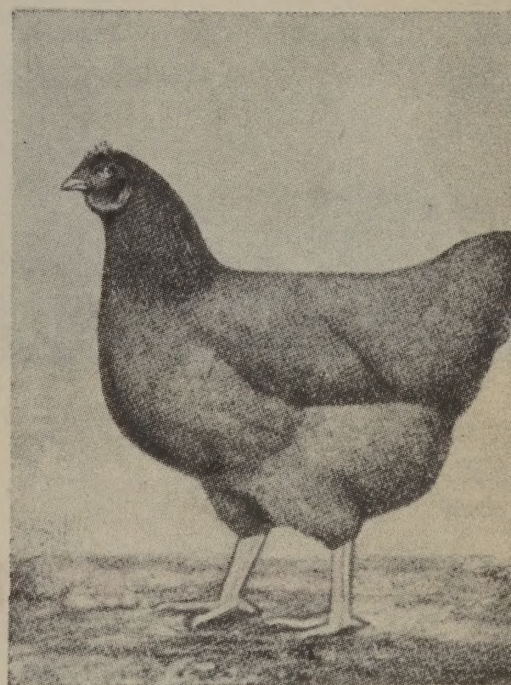

The Ideal Breed for the North

They feather and develop very rapidly and easily withstand our cold winters. They are good meat birds, heavy producers of large eggs, and possess an abundance of vigor. They have a plump thick-set body and are bayish red in color. They were originated in the State of New Hampshire over 30 years ago, and have become one of the leading breeds in many parts of the Eastern States, Ontario, Manitoba and British Columbia. Our flocks are all Christie Strain, which is the leading flock in New Hampshire. All who have tried

New Hampshires are delighted with their fast growth and heavy winter egg production. We have increased our supply of this breed, so can fill all orders promptly.

RHODE ISLAND REDS

The Carrot River Valley has outstanding flocks of this breed, and it is because of this extra high quality of our Rhode Island Reds that they are so popular here in the North. This breed is especially well suited for the large scale production of eggs in well cared for flocks. Many of our flocks are headed with R.O.P. males. If you want good meat birds with high egg production and good egg size you can't go wrong in ordering Rhode Island Reds.

Kindersley, Sask.,

Jan. 12, 1942.

Smith Hatchery:—

Would you please send me your catalogue of prices, etc., for this year.

My last year shipment of N. H. chicks from you was very satisfactory. All chicks were alive upon arrival, and of these I raised 97% to maturity.

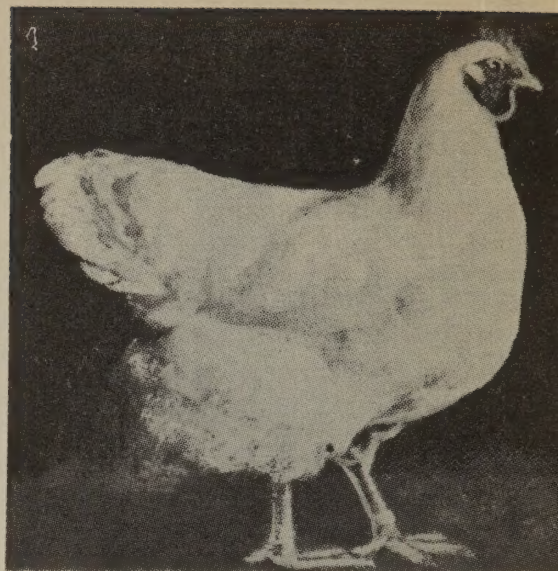

Taking this opportunity to thank you, I remain,

Yours sincerely,

—J. B. T.

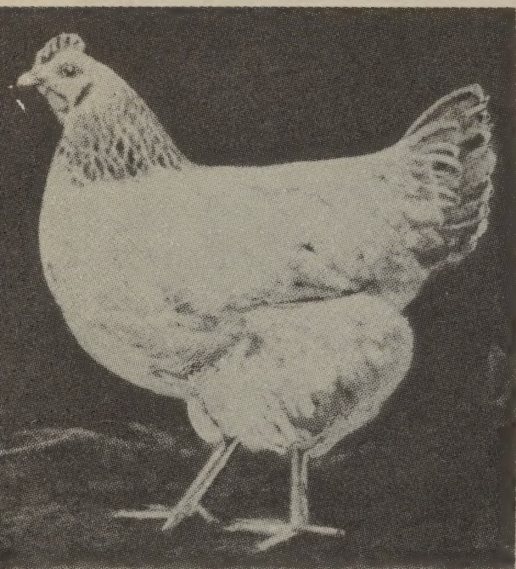

WHITE ROCKS

This breed is becoming more popular every year. They are similar to the Barred Rock in size and type, but because of their white feathering the cockerels dress out a very attractive carcass. The chicks of this breed have a grey to smut color when first hatched, but feather out snow white.

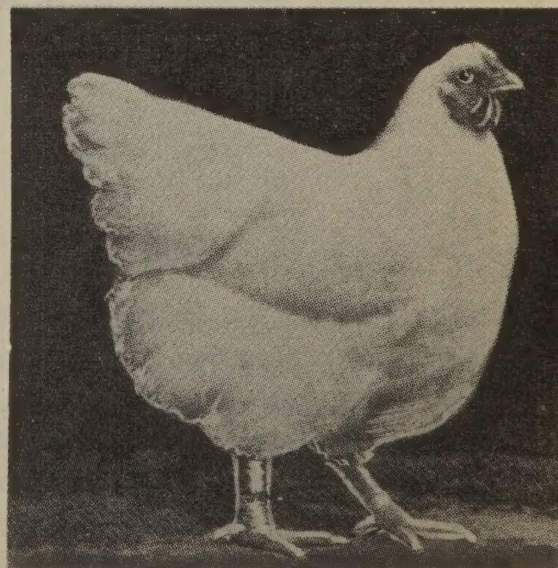

LIGHT SUSSEX

The most popular breed in England, and becoming very prominent in Canada. This breed has become very popular and is in heavy demand. All who have raised this breed are very well pleased with them as outstanding meat birds and also very good layers. They are very pretty birds, being white with some black around the neck, in wings and in the tail. They have a well-fleshed breast, and with their white skin and fleshing they make a very attractive dressed bird with a milk fed appearance. They make quick growth and are very hardy.

WHITE WYANDOTTES

The beautiful white bird, very popular for both meat and eggs. The white feathers make dressing much easier, and with the plump, thick-set body they yield a very attractive dressed carcass. They do not become too rangy even when growing, and so can be marketed at any age. The demand for this breed is very heavy, so order early.

SHE—

Oh hubby, how I envy the Victorian age hen;
She would lay twenty eggs, perhaps twenty-one;
Then hatch and raise a few chicks—
And, believe it or not, her year's work was done.

Now I think we wives should mark our ballots,
And let the whole world see
That we prefer to hatch our own,
Than send to some far Hatchery.

HE—

Well Biddy, my dear, if you ask me,
A gad is a whip without a cracker,
And your ideal old Victorian hen
Was nothing but a darned old slacker.

I've travelled about within my time,
And hatcheries I've looked at one by one;
And Smith's it is the very best
You'll find in all Saskatchewan.

They select their eggs with utmost care,
And your chicks arrive with eyes so bright,
Each equipped with a little comb
To keep their plumage right.

So you must lay ninety eggs for the old home town,
And ninety more for reproduction,
Then after that one hundred more
To save Britain from destruction.

Then change your dress, take a beauty bath,
And please don't look at me like that, dear;
For I absolutely guarantee
Luxury then for the rest of the year.

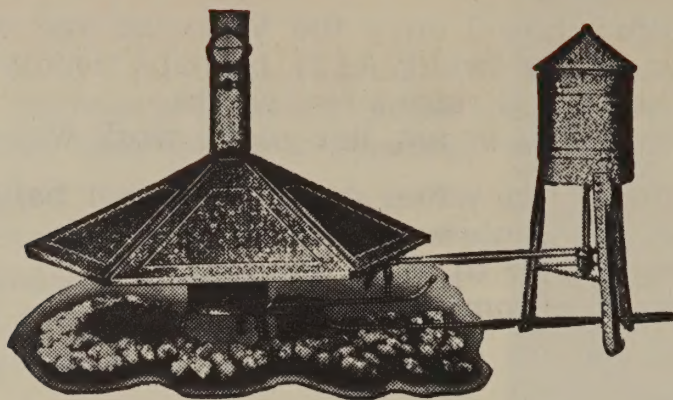

More Eggs for Britain . . .

Let us show Britain
that we will do our
part to help her on to
victory. Let us re-
solve in 1942 to pro-
duce more eggs and
dressed poultry than
ever before.

THERE'LL ALWAYS BE AN ENGLAND

The Jamesway OIL BURNING BROODER STOVE

"THE BROODER WITHOUT AN EQUAL"

NO OTHER BROODER GIVES YOU ALL THESE FEATURES

1. It maintains a steady temperature under the hover, day and night, regardless of any change in the weather.
2. Accurate thermostat control by automatic oil-flow regulator; no wick to plug up or smoke.
3. It won't go out. It has fuel capacity for four days or more.
4. Fuel: No. 1 Furnace Oil, Kerosene, 38-40 Distillate. (Not Diesel Fuel.)
5. Cost to Operate—Not any more than coal.
6. When the sun comes through the windows in the middle of the day, the stove cuts 'way down; and avoids overheating the chicks. No pasting up behind.
7. You don't have to look at it during the night. No matter how the weather changes, the temperature will be the same; no chilling or diarrhoea.
8. The JAMESWAY OIL BROODER can be set at, and will maintain, any desired temperature. This can be reduced, from time to time, as the chicks grow.
9. The fumes and foul air are all removed from the room.
10. A high wind has no effect on the stove, due to the action of the automatic damper and revolving smoke cap.
11. No danger of setting fire to the litter or buildings. No ashes to remove.
12. When not in use brooding Baby Chicks, the Double Duty Jamesway Oil Burning Brooder can be used to advantage brooding Baby Pigs, or placed in a circulator (temperlator) to heat the hen house or hog house and keep it dry. Write for full particulars.
